

Client Spotlight: tec5USA

tec5USA
MEMBER OF THE NYNOMIC GROUP

At Perry Johnson Registrars, we take pride in the diversity and excellence of our certified clients. This month, we're shining the spotlight on **tec5USA**, a distinguished leader in the field of spectrometer-based inspection systems and Contract Manufacturing. Based in Plainview, NY, with the backing of its global parent company, the Nynomic group, tec5USA stands out for its innovative approach and commitment to quality.

tec5USA specializes in providing comprehensive solutions tailored to meet specific client needs. Their core offerings include integrated spectrometer-based inspection systems, designed as turnkey solutions that cater to a wide range of industries. They also supply OEM components like spectrometer lab benches, electronics, probes, and optical components, highlighting their versatility and commitment to supporting their clients' diverse requirements.

Additionally, they have contract manufacturing capabilities which originated from their proficiency in photonics and relevant testing protocols in the medical devices arena. With their expertise in photonics for production of adjacent devices in medical imaging and life science devices (ophthalmic instruments, endoscopy, microscopy, laser surgery, OCT, multispectral imaging, DNA sequencers, flow cytometry, phototherapy, breathalyzers, hematology, oncology, fiber-optical systems, etc.) but also LIDAR and optical tracking systems. As an OEM partner, they specialize in unique technological designs and solutions, supply-chain integrated, high quality control, state-of-the-art CMO operations for photonics-related devices.

The company proudly holds four ISO certifications, underscoring their dedication to quality and efficiency. The impressive lineup consists of ISO 9001:2015, ISO 13485:2016, ISO 14001:2015, and ISO/IEC 27001:2022. These certifications assure customers of tec5USA's ability to adhere to documented procedures and stringent specifications, fostering trust and opening doors to new business opportunities.

tec5USA's partnership with Perry Johnson Registrars has been instrumental in achieving their certification goals. Thanks to the guidance and support from PJR, tec5USA has successfully met multiple ISO standards within an aggressive timeline, further solidifying their reputation in the industry.

Looking ahead, tec5USA is focused on consolidating its position as a leader in spectroscopy application. With the introduction of their "Smart Spectrometer Electronics," the company is set to revolutionize sample analysis and real-time calibration, thereby enhancing their contract manufacturing operations.

As a member of the Nynomic family, tec5USA is committed to pioneering advanced spectrometer solutions that empower their customers. Their philosophy revolves around enabling innovation, maintaining the highest quality standards, and upholding social responsibility through their continued ISO certifications.

tec5USA distinguishes itself through its unwavering commitment to on-time deliveries, expert supply chain management, and a relentless pursuit of improvement. Their broad industry presence and the ability to provide exceptional support make them the preferred choice for spectrometer solutions and contract manufacturing.

At Perry Johnson Registrars, we are proud to support tec5USA in their journey towards excellence. Their dedication to quality, innovation, and customer satisfaction exemplifies the best of what our certified partners can achieve. We look forward to continuing our partnership with tec5USA as they explore new frontiers and set new benchmarks in the industry.
