

Client Spotlight:

United Electronic Recycling, LLC

Pioneering Sustainable Electronics Solutions with Data Security at the Core

United Electronic Recycling, LLC (UER) is a Texas-based company that has been making waves in the electronic recycling and data security industry since its establishment in 2011. Headquartered in Coppell, Texas, the company is a prominent player in the field, offering a range of services that include electronic recycling, hard drive shredding, data security, IT asset disposition (ITAD), and paper destruction services.

UER distinguishes itself through its commitment to the highest standards, made evident in its certification under The Sustainable Electronics Reuse & Recycling (R2) Standard v3 and RIOS:2016. Multiple industries face the risk of data breaches, identity theft, and business fraud because of the presence of data on retired digital assets. These certifications confirm that UER is following the highest standard of processing to provide secure data destruction. Informing their customers that all data destruction processes are reviewed and validated by an independent party is an additional layer of security and peace of mind.

Certification is a critical factor in the company's success, setting it apart from competitors by offering clients guaranteed data security and destruction. United Electronic Recycling acknowledges the pivotal role played by Perry Johnson Registrars (PJR) in guiding them through the certification process. UER's Sales and Marketing Manager, Elizabeth Keller, stated, "Perry Johnson Registrars brought our ideas, goals, and standards together with the latest version of R2 certification and guided us into creating documented processes that are now a way of life for our company. We were truly happy with the attention we received during the entire process!"

At UER, they pride themselves on being a leading partner in the recycling industry. With over a decade of recycling experience, processing millions of pounds of electronics annually, UER is a trusted electronic waste service provider across the country. Their team of experts has 100+ years of collective industry experience supporting 5000+ collection events! They are passionate about serving their industry and have participated in many local and state level organizations such as The State of Texas Alliance for Recycling and Keep Texas Beautiful.

Looking ahead, United Electronic Recycling plans to continue expanding its recycling services while maintaining a focus on providing the highest level of service and cost-effective pricing. The company also owns and operates Mobile Shred IT, a division dedicated to document destruction and paper shredding services. The company is working towards achieving the NAID AAA Certification for its paper shredding process, reinforcing its commitment to offering the utmost security for its clients.

United Electronic Recycling's philosophy revolves around leading with sustainable practices, protecting environmental quality for future generations, and consistently exceeding industry standards. The company's motto, "Recycling Today for a Better Tomorrow," encapsulates its dedication to making a positive impact on the environment and ensuring the secure and responsible disposal of electronic waste.
